	Stretcher? <input type="checkbox"/> Yes <input type="checkbox"/> No

FOLLOW UP CARE COORDINATION REQUEST

1. The Referring Physician Practice ("Practice") and Southwest Atlanta Vascular Care ("PVG") acknowledge that there is a significant need in the Atlanta community ("Community") for a comprehensive, high quality, accessible, cost-effective, and coordinated approach for the delivery of care to ESRD patients.
2. Practice and PVG desire to manage and coordinate care services for ESRD patients by offering coordinated care delivery and care coordination programs to assist with managing and improve care coordination and outcomes for ESRD patients which will specifically address reduction in potentially avoidable rehospitalization, reduction in unnecessary emergency department utilization and appropriate care strategies for ESRD patients that include vascular access services provided by PVG.
3. Practice requests that PVG provide: (a) ongoing assessment of the vascular access of the patient as determined to be medically necessary by Practice and/or PVG; (b) medically necessary and clinically appropriate medical interventions to address any vascular issues that materially affect a patient's ability to receive dialysis services; and (c) timely updates to Practice of all services provided by PVG to Practice's patients.
